Lecture #	Lecture Date	Lecture	Homework Due, Before 2pm	Exams or Quizzes (Quiz dates tentative)	Reading Homework Due, Before Midnight
		Tentative Schedule for Summer 2020			
1	1-Jun	Course Introduction			
2	2-Jun	Voltage, Current, Energy, Power			
3	3-Jun	Power, Energy, Sign Relationships			Chapter 1
4	4-Jun	Power, Sign Relationships, Example Problems	HW #1 - Voltage, Current, Power and Energy		Chapter 2
5	5-Jun	Sources, Resistors			
6	8-Jun	Kirchhoff's Laws	HW #2 - Power and Energy as a Function of Time	Quiz 1	
7	9-Jun	Kirchhoff's Laws Example Problems			
8	10-Jun	Kirchhoff's Laws Example Problems	HW #3 - KVL and KCL	Quiz 2	Chapter 3
9	11-Jun	Series, Parallel, Delta to Wye	HW #4 - KVL and KCL with Simultaneous Equations		
10	12-Jun	Series, Parallel, Delta to Wye Example Problems			
11	15-Jun	Voltage Divider Rule, Current Divider Rule	HW #5 - Modeling and Equivalent Resistances	Quiz 3	
12	16-Jun	**Exam 1**		**Exam 1**	Chapter 4
13	17-Jun	Node-Voltage Method			
14	18-Jun	Node-Voltage Method			
15	19-Jun	Node-Voltage, Example problems			Chapter 5
16	22-Jun	Mesh-Current Method, Example problems	HW #6 - Node Voltage Method	Quiz 4	Chapter 6
17	23-Jun	Source Transformations; Thevenin's and Norton's Theorems	HW #7 - Mesh Current Method		Chapter 7
18	24-Jun	Thevenin's and Norton's Theorems		Quiz 5	
19	25-Jun	Thevenin and Norton's theorems problems	HW #8 Thevenin and Norton's Theorems		
20	26-Jun	Maximum Power Transfer, Superposition			Chapter 8
21	29-Jun	Course Review	HW #9 - Thevenin and Norton, Maximum Power, Superposition	Quiz 6	Chapter 9
	1-Jul	**Final Exam**		**Final Exam - Wed., July 1, 2pm**
