

# Pre-classwork 2/11

ECE 3340 - U. Houston

*name, ID*

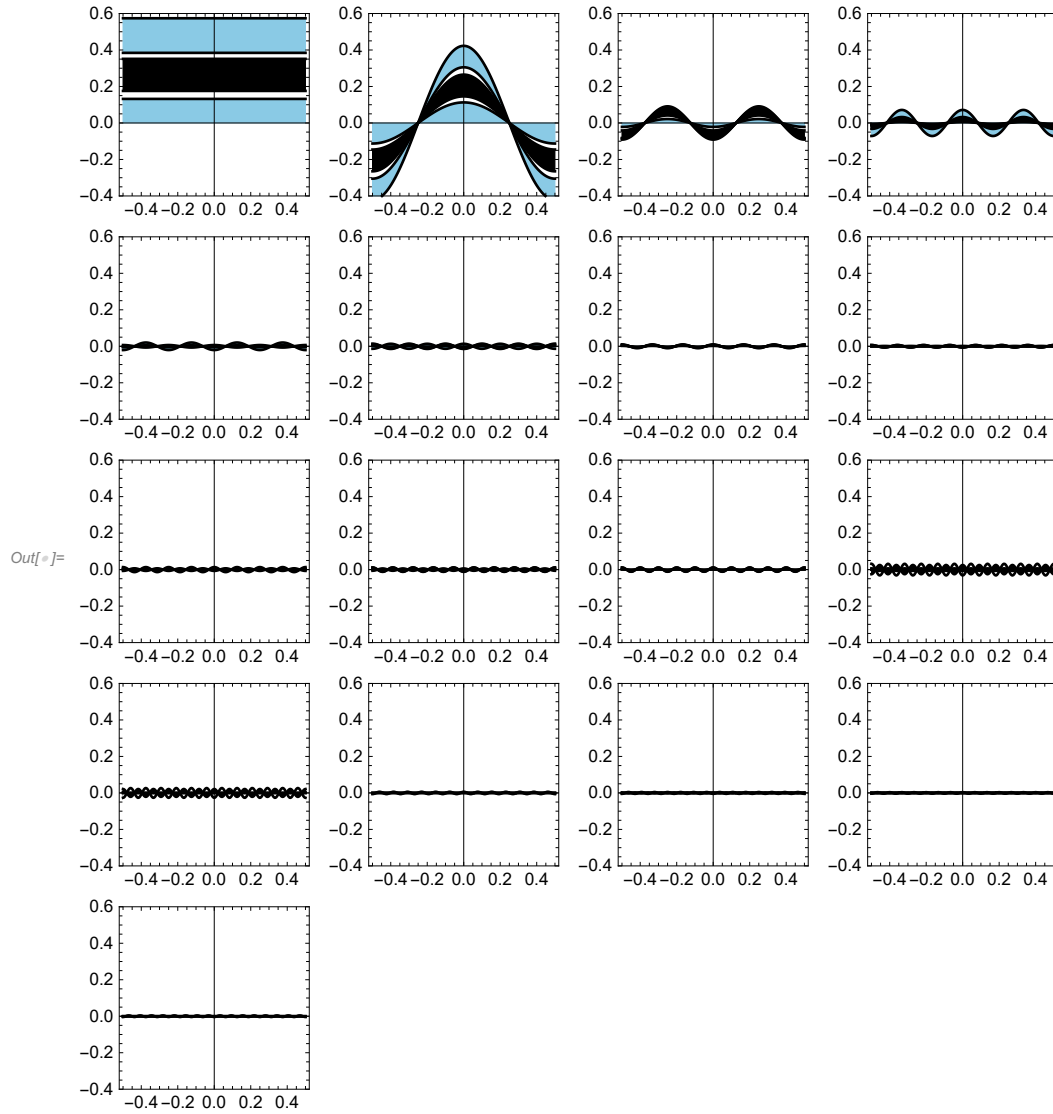

**Do the work below at home - print out, bring in class for credit**

---

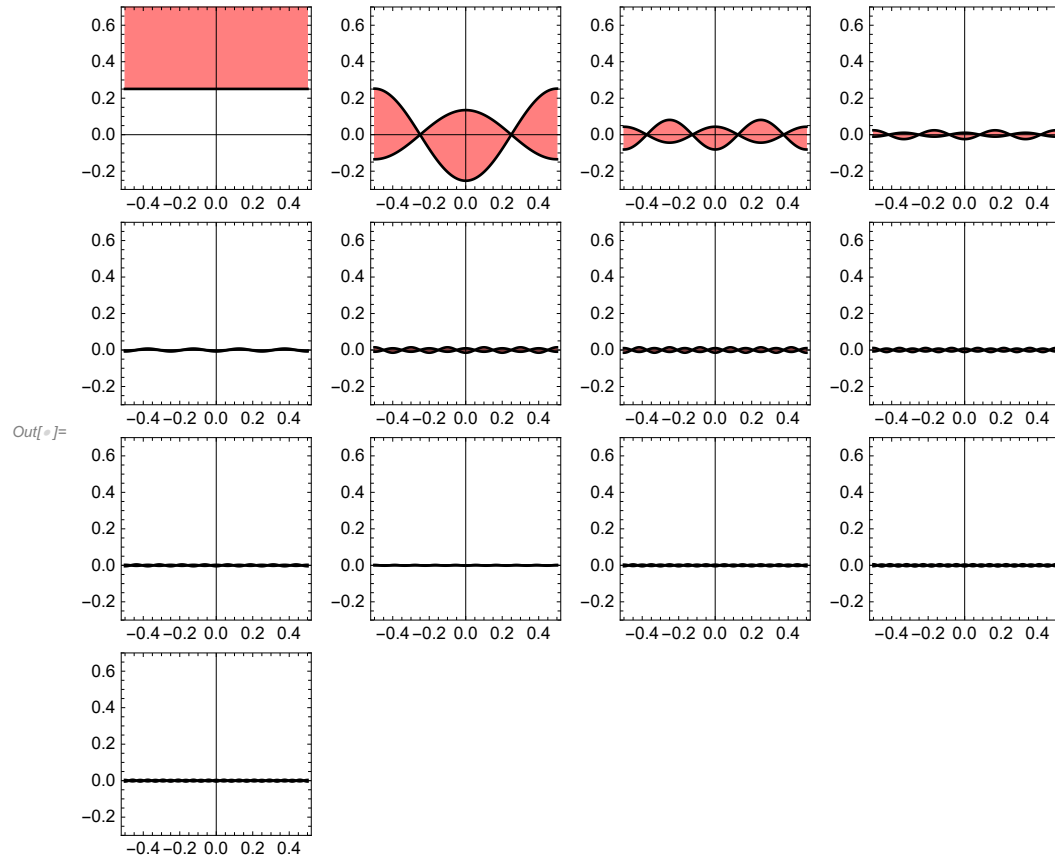

## Problem: visual capability test

Make your best guess: sketch/draw what you think the final patterns will look like if you ADD all of the figures of each set below together? Note that all the figures in each set are plotted on the same scale. Adding means that bands of the same color and position are added together. Use hand sketch/drawing. (10 pts each, total = 50% classwork. Classwork itself is 100%, hence, this counts as 0.5 CW at home).

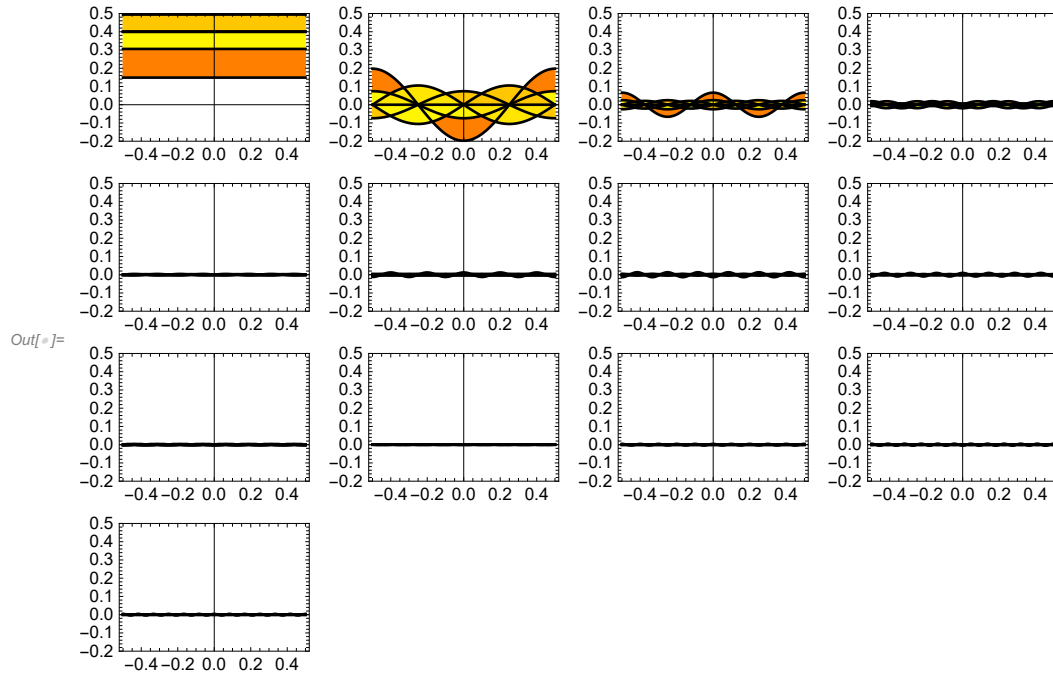

## Set 1

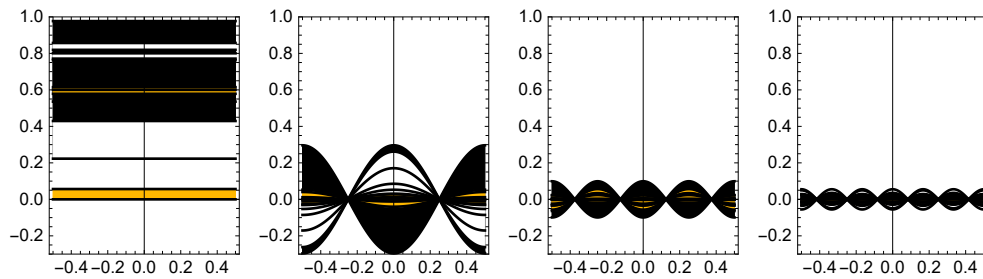

## Set 2

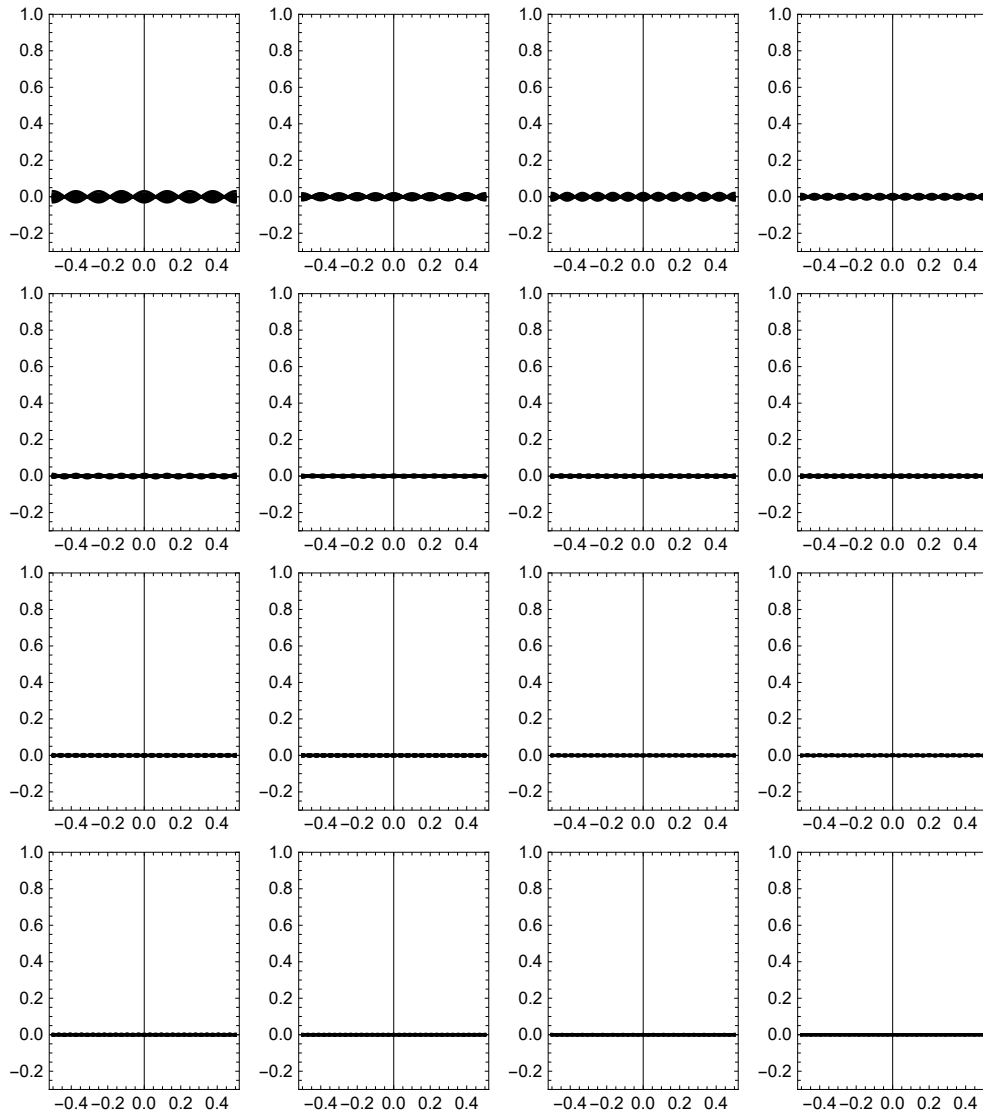

### Set 3

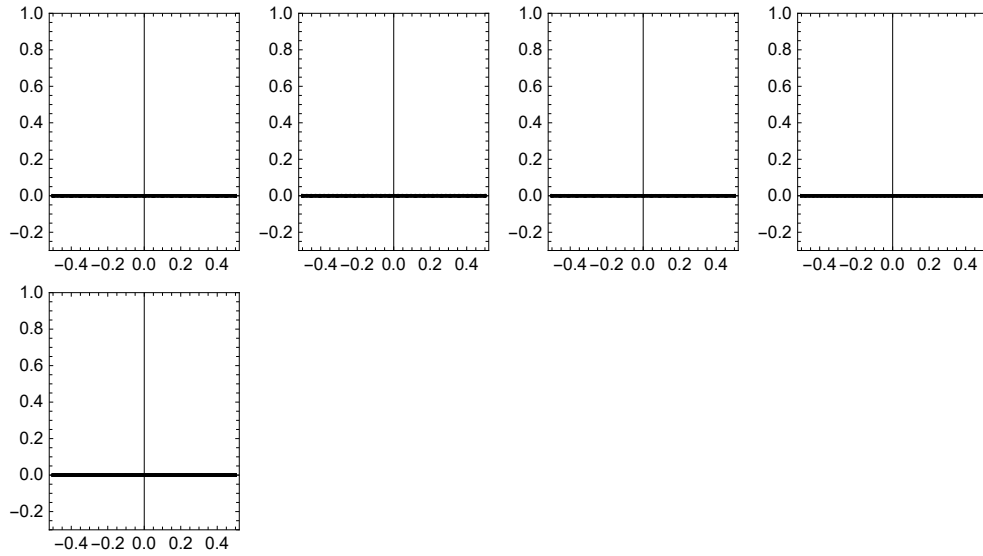

### Set 4
