

ECE 4339

Class Demonstration

What to do

- In this demonstration, you will observe, take notes, and prepare to write a report to answer a series of questions
- The objective is for you to be an observant scientist who will describe and explain various phenomena according to the scientific theory that you have learned in the class.
- The questionnaire during the demonstration is only a guideline – you are encouraged to record as many phenomena as possible that are relevant to the science and technology we are studying in this course.
- Your report will contain these observations and their scientific explanations, organized in a thematic and cohesive manner.
